OBJECTIVE

Software Engineer proficient in JavaScript, React, Node.js, Express.js, MongoDB, and MySQL, seeking full-time software engineering roles. Passionate about building scalable, responsive, and user-friendly applications.

SKILLS

Programming Languages	C, C++, Java, JavaScript, TypeScript, Python
Frontend	HTML5, CSS, TailwindCSS, React.js, Redux, Next.js
Backend	Node.js, Express.js, RESTful API, Cloudinary, JWT, Socket.io, Prisma
Database	MySQL, MongoDB, PostgreSQL
APIs/Integrations	Google Maps API , Chrome Extensions API
Browser Extensions	Chrome Extension Development, Session Management
Version Control	Git, GitHub
Soft Skills	Effective Communication, Fast Learner, Adaptability

PROJECTS

Travel Planner – Personalized Trip Planning Platform

Developed a full-stack travel planning web application that enables users to create custom itineraries, visualize routes on interactive maps, and discover attractions. Integrated Google Maps API for geolocation and mapping, used Prisma ORM with PostgreSQL for robust data management, and implemented authentication and responsive UI.

Tech Stack: Next.js, Google Maps API, Prisma, PostgreSQL

NextHire – Online Job Portal

Developed a scalable job portal connecting job seekers and recruiters, featuring job posting, applications, and automated email notifications. Integrated Redux for state management, Nodemailer for emails, and Cloudinary for file uploads. Implemented role-based dashboards, job tracking, responsive UI, and advanced search/filter options.

Tech Stack: React.js, Express.js, MongoDB, CSS, Nodemailer, Cloudinary, Redux

Session Manager – Chrome Extension for Tab Organization

Built a Chrome extension that allows users to save, restore, and organize browser sessions and tab groups for enhanced productivity. Implemented session storage, tab management, and a user-friendly popup interface using JavaScript and the Chrome Extensions API.

Tech Stack: JavaScript, HTML5, CSS, Chrome Extensions API

TogethrTask – Collaborative Task Management Web App

Built a real-time collaborative task management app enabling users to create, assign, and manage tasks with seamless team synchronization. Used Socket.io for live updates and notifications.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Socket.io, Nodemailer

CERTIFICATIONS

Oracle Cloud Infrastructure: Generative AI Professional

Demonstrated expertise in designing, deploying, and managing generative AI solutions using Oracle Cloud Infrastructure (OCI)

EDUCATION

Bachelor of Engineering in Computer Science (IoT Specialization), Chandigarh University 2022 – 2026
